FIVE BUSY HONEY BEES

Five busy honey bees are resting in the sun.

The first one said, "Let us have some fun."

The second one said, "Where shall it be?"

The third one said, "In the honey tree."

The fourth one said, "Let's make some honey sweet."

The fifth one said, "With pollen on our feet."

The five little busy bees sang their buzzing tune.

So they worked in the beehive all that afternoon,

Bzzzz! Bzzzz! Bzzzz! Bzzzz! Bzzzz!

THE ASS AND THE GRASSHOPPER

An ass was walking in the pasture, he found some chirping merrily in a grassy corner of the field. He had a great deal of admiration for the song of the grasshoppers. He sang a joyful song that his pleasure-loving heart was filled with joy as they did.

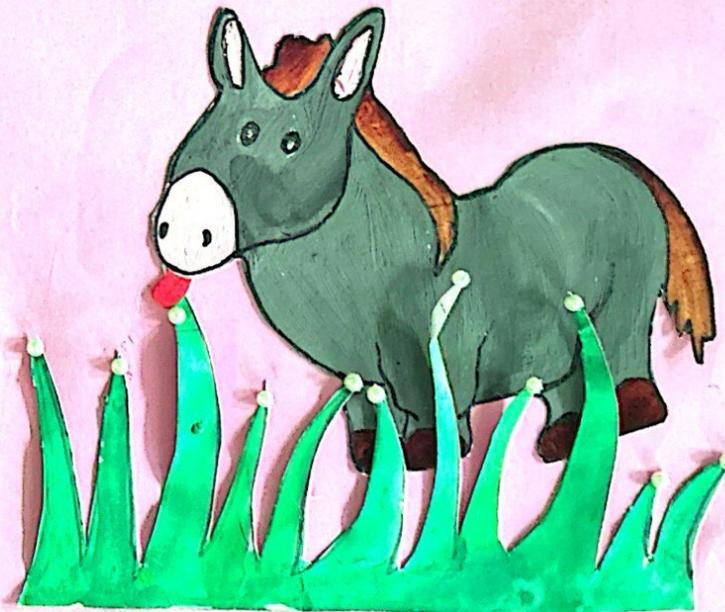

"Is it?" he asked very respectfully, "that has given you your voices? Is there any special food you eat, or is it some special dew that makes you sing so wonderfully?"

The grasshoppers, who were very fond of a joke, replied, "Think! Try some and see."

The ass would eat nothing but dew.

The poor foolish

Story

THE ASS AND THE GRASSHOPPER

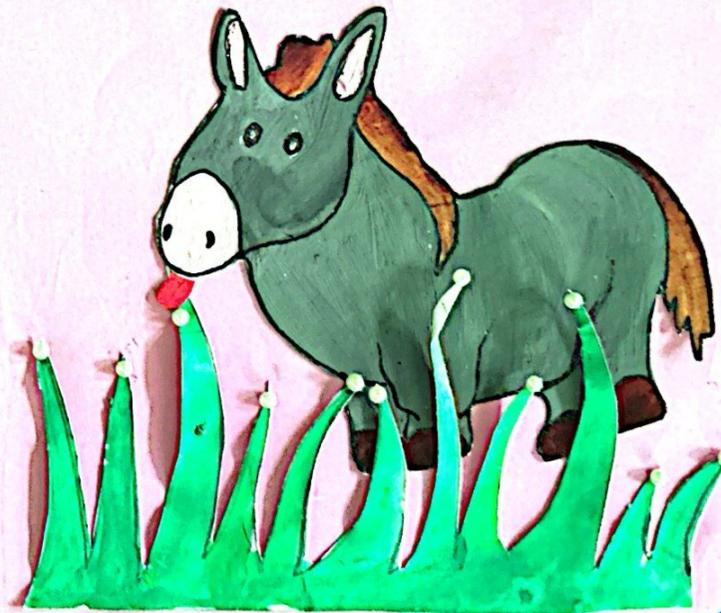

One day as an ass was walking in the pasture, he found some grasshoppers chirping merrily in a grassy corner of the field. He listened with a great deal of admiration to the song of the grasshoppers. It was such a joyful song that his pleasure-loving heart was filled with a wish to sing as they did.

"What is it?" he asked very respectfully, "that has given you such beautiful voices? Is there any special food you eat, or is it some divine nectar that makes you sing so wonderfully?"

"Yes," said the grasshoppers, who were very fond of a joke; "It is the dew we drink! Try some and see."

So thereafter the ass would eat nothing and drink nothing but dew.

Naturally the poor foolish ass soon died.

Animal rights awareness week celebrated

CORRESPONDENT

GOALPARA, July 3: Goalpara College, for the first time, celebrated Animal Rights Awareness Week from June 23 to 29 on the theme 'Voice for the voiceless'.

Organised by the college's animal welfare unit and the NSS unit, the event was inaugurated by its principal Subhash Barman.

Barman spoke about the importance of spreading awareness on animals. Santosh Kumar Mishra and Abul Husain urged all to make this world a better place for animals. On the occasion, a sapling was planted by Prof Yasavanta Ray.

An awareness programme was led

by J Das and M Basumatary, and an outreach programme was conducted in Dudhnoi and Lakhipur along with the volunteers guided by Rody V Faihriem of the animal welfare unit and Jugabrat Das of the NSS, Mijing Gwra Basumatray of the NCC, and Dhiraj Bora, assistant professor in the Zoology department.

Various activities like essay and slogan writing competition and photography competition were organised for the students for creating awareness.

The valedictory meeting was attended Ranjit Choudhury, Jayanta Kumar Brahma and Mozbul Hoque. Imran Khan, a volunteer of the animal welfare unit and the NSS, was awarded the title 'Ambassador' for his contributions.

Awareness generated on biodiversity, conservation

CORRESPONDENT

BISWANATH CHARALL, July 2: An awareness programme on 'Biodiversity Conservation and Tourism Industry' was organised at Ripunjay Knowledge Hub in Biswanath College here on Wednesday by the Department of Zoology.

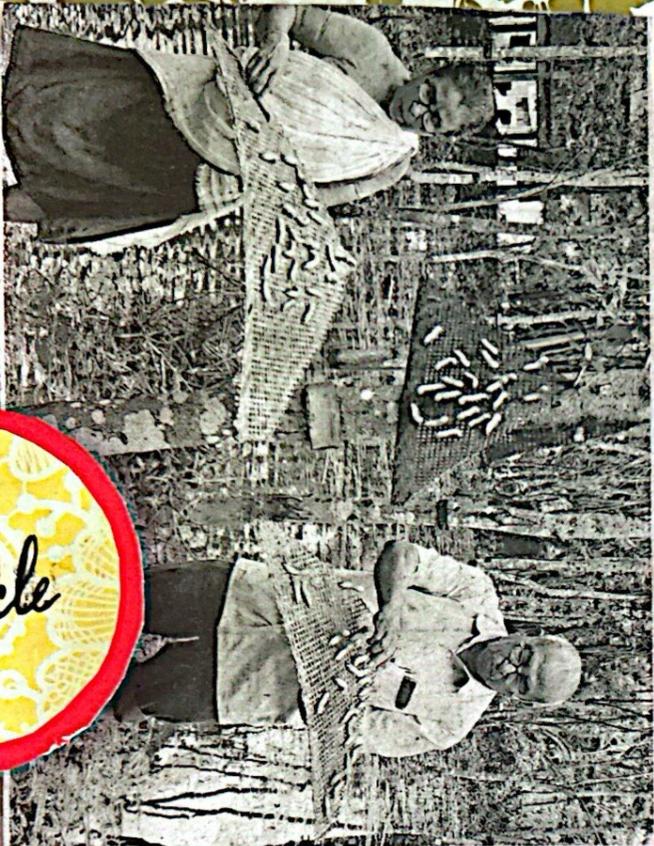

The programme was attended by Roshan Upadhyay, better known as the "Butterfly Man of Arunachal Pradesh." It may be mentioned here that Upadhyay has discovered 13 new species of butterflies and entered his name in the *India Book of Records and Asian Book of Records*.

Upadhyay delivered a lecture on 'Nature Conservation and Eco Tourism'. He gave detailed information about the

butterfly species that were normally found in the Northeast as well as in Assam and especially in Behali Wildlife Sanctuary in Biswanath district and their current status through state-of-the-art technology.

He also laid emphasis on awareness and conservation of other animals and thus development of tourism in the area.

Another speaker in the meeting, Parkshit Kalita, a person involved with biodiversity conservation of organisms, gave a detailed analysis of the precautions to be taken and the necessary scientific principles to be followed in this regard. The programme was attended by a good number of students and teachers.

BISWANATH CHARALI, July 2: An awareness programme on 'Biodiversity Conservation and Tourism Industry' was organised at Ripunjay Knowledge Hub in Biswanath College here on Wednesday by the Department of Zoology.

The programme was attended by Roshan Upadhyay, better known as the 'Butterfly Man of Assam' and Pradish. It may be mentioned here that Upadhyay has discovered 13 new species of butterflies and entered his name in the *India Book of Records* and *Asian Book of Records*.

Upadhyay delivered a lecture on 'Nature Conservation and Eco Tourism'. He gave detailed information about the

butterfly species that were normally found in the North East as well as in Assam and especially in Bhabai Wildlife Sanctuary in Biswanath district and their current status through state-of-the-art technology.

He also laid emphasis on awareness and conservation of other animals and thus development of tourism in the area.

Another speaker in the meeting, Parkshit Kalie, a person involved with university conservation projects, gave a detailed analysis of the precautions to be taken and the necessary scientific principles to be followed in this regard. The programme was attended by a good number of students and teachers.

Butterfly, you're beautiful
Your colors are amazing
You're beautiful, butterfly
You're totally breathtaking
Your wings flutter in the breeze
A wonderful sight to see
You rest upon a yellow flower
And looks so very pretty

Butterfly, you're beautiful

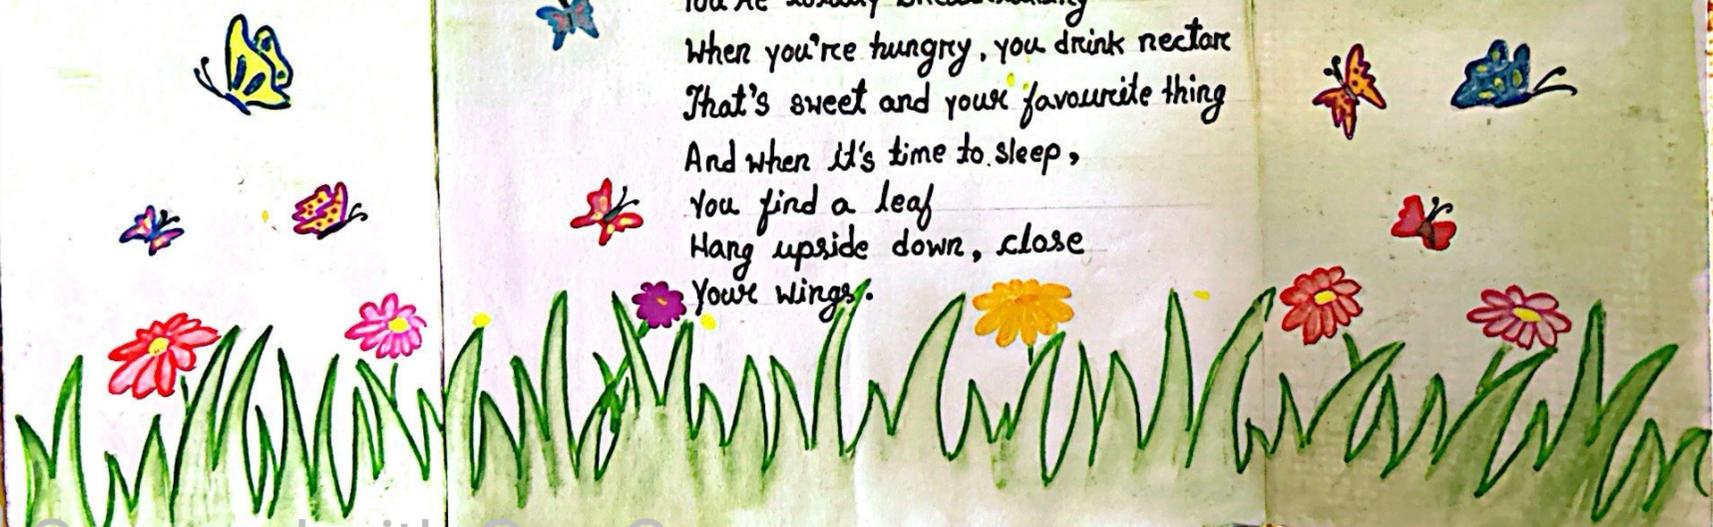

Your colors are amazing
You're beautiful, butterfly

You're totally breathtaking

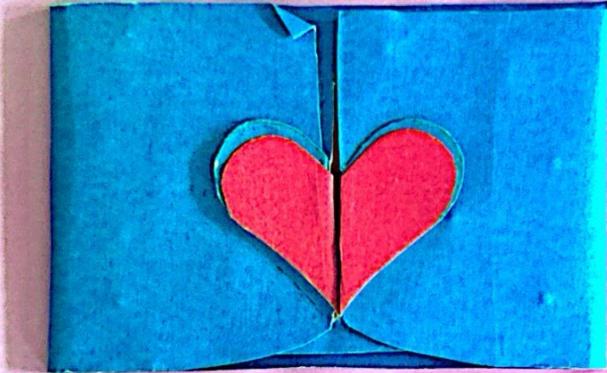

When you're hungry, you drink nectar
That's sweet and your favourite thing

And when it's time to sleep,

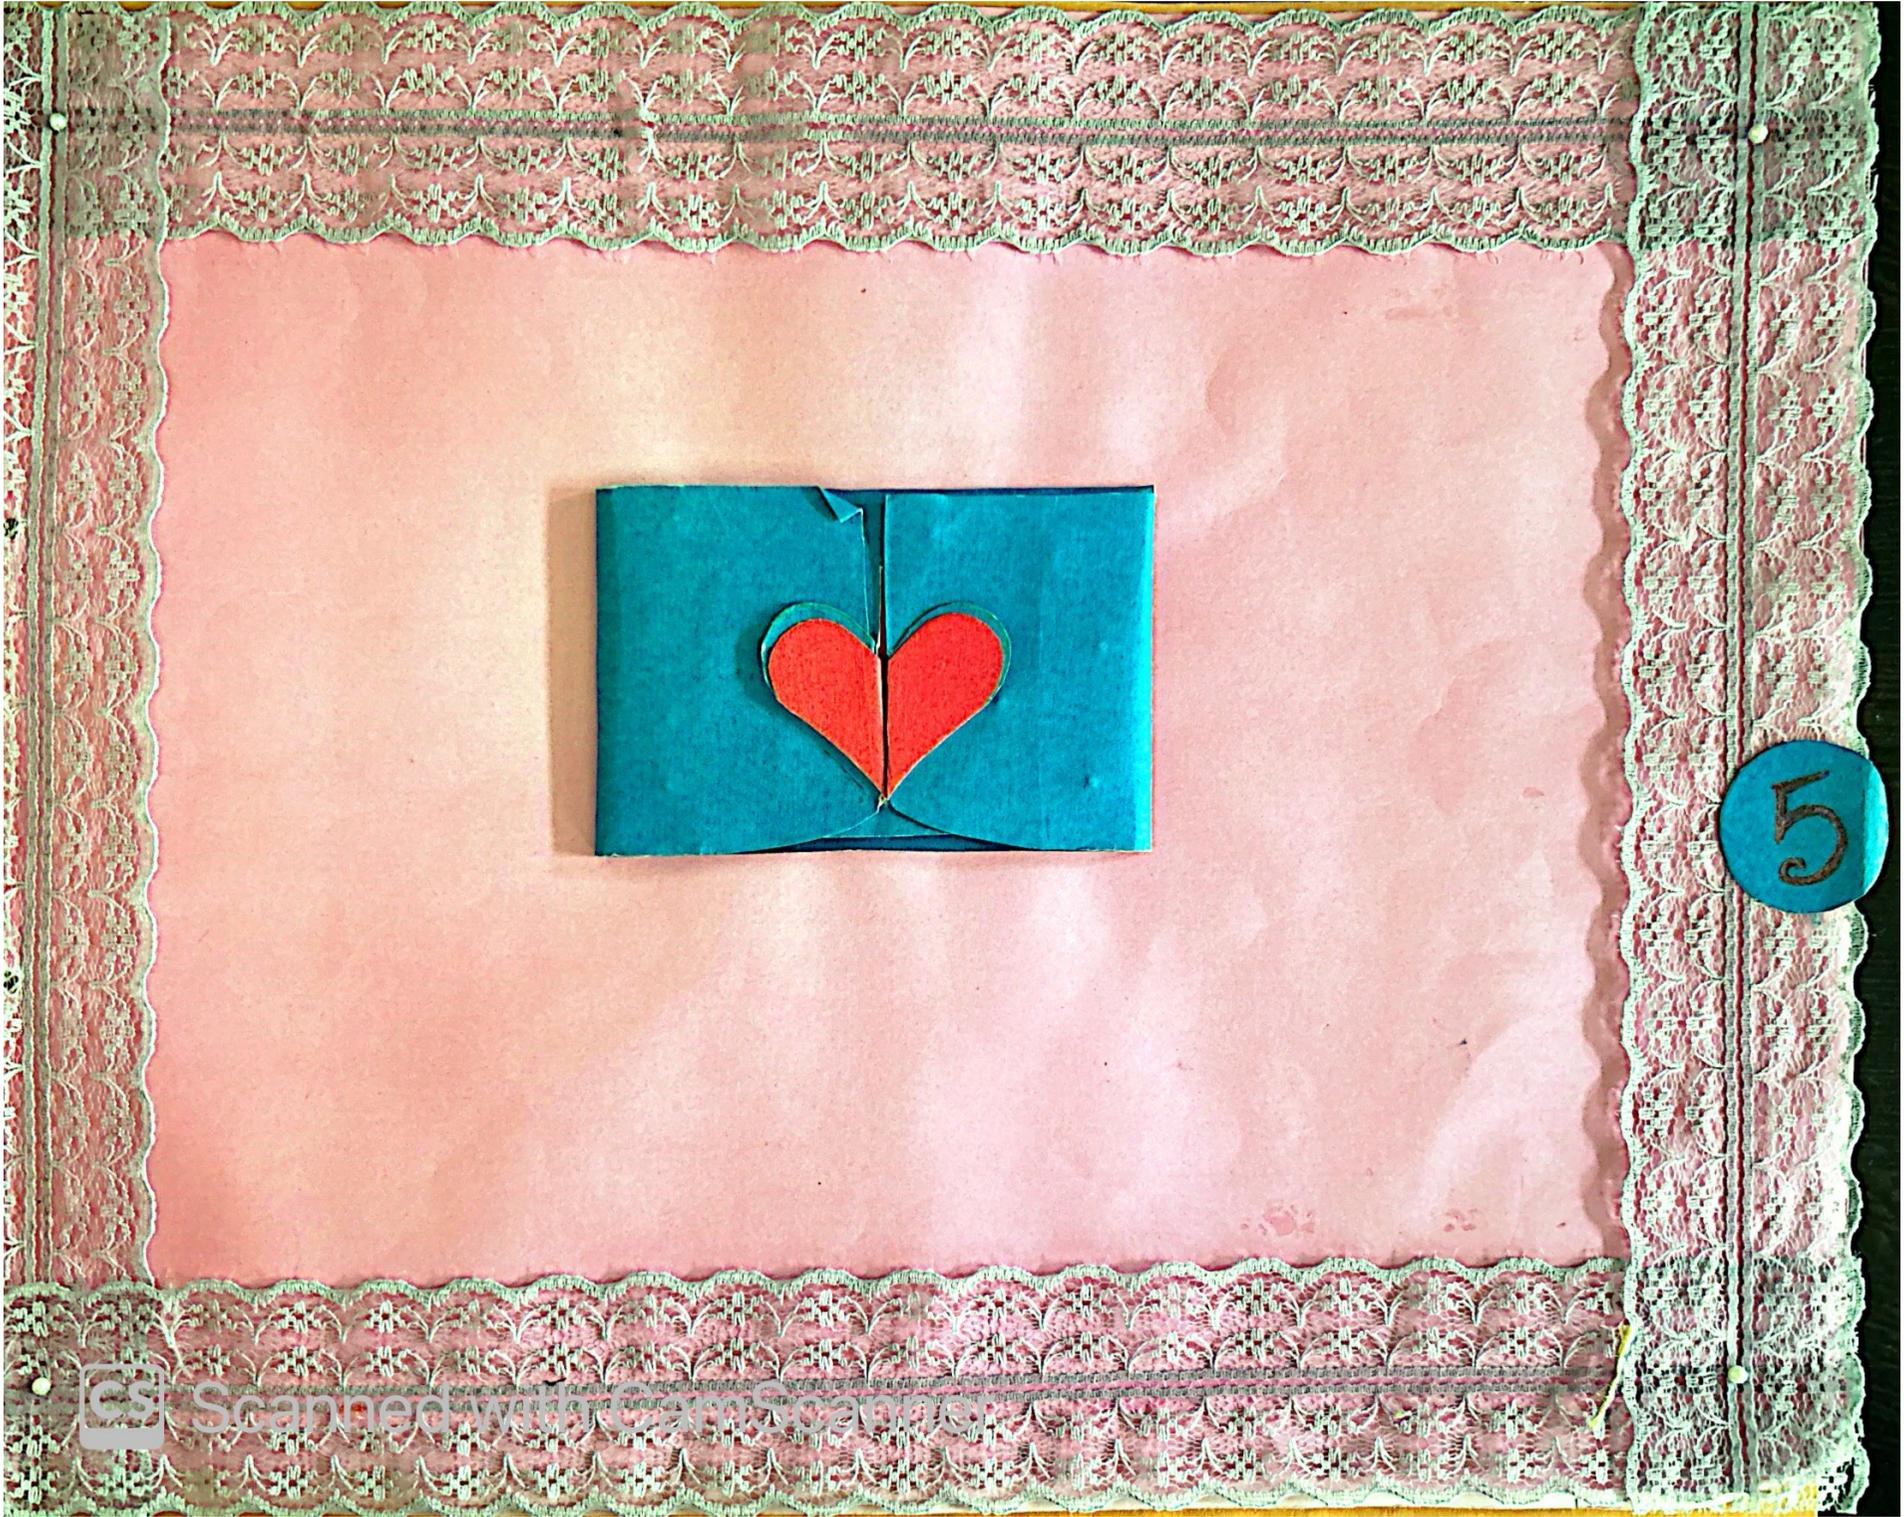

You find a leaf
Hang upside down, close
Your wings.

Riddle

5

1) You see me blink but not my eyes.
I wink and wink to breathe
And if I wink at her just right.
Then I may find my love tonight.

✿ Finally ✿

2) They say I eat like a hummingbird,
sting like a bee though you
may think me a hummingbird
There'll be no sting from me.

✿ Sphinx Moth ✿

3) I am often red with black spots.
I have a head, thorax and abdomen.
I like to eat aphids. What am I?

✿ Ladybug ✿
